

Career Interests Results

John Smith

Date compiled: September 7, 2022

Overview of your results

About this test

The Career Interests Test is designed to reveal your key areas of interest based on the work activities that you find most compelling and enjoyable. Using the personalized insights in this report, you'll gain a better understanding of what type of work best aligns with your passions – and what doesn't – so you can make a better-informed career decision.

How you scored

We evaluated your answers against 27 areas of interest. This is a snapshot of your results:

What your results mean

John, your strongest interests are: **Art, Craft and Design, Engineering, and Science and Research.** This means that you're passionate about creating art and design works, working with scientific and mathematical principles, and working on research projects.'

Your results also show that your weakest interests are: **Tourism and Leisure, Agriculture and Farming, and Military.** This indicates that you won't enjoy working within these areas.

Art, Craft and Design

96%

About this interest

Whether it's painting a portrait, making jewelry, beautifying indoor spaces, or designing clothes or websites, Art, Craft and Design has something for everyone with a creative imagination and an artistic flair. Indeed, there are many fields to specialize in, including architecture, fine art, graphics, illustration and digital media. Although competition in this area is high, the work itself can be very fulfilling and rewarding, as it enables you to express your creativity and artistic abilities, while it offers you the opportunity to turn your passion into a money-making career.

Median Salary: \$57k

Annual salary estimates are based on percentile wage data collected through the BLS Occupational Employment Statistics (OES) survey of US workers. The median annual wage for all occupations is \$45,760.

Job outlook: 2% growth, 39.7k new jobs

Employment growth rates are based on 2020–2030 projections collected through the BLS Employment Projections (EP) program. The national average growth rate for all occupations professions is 8%

Your score explained

John, you scored **96%** in the Art, Craft and Design interest area, which indicates that you have a **very strong preference** for creating art and design works.

Your score indicates that you are **extremely passionate** about creating artworks, learning about artistic styles, crafting things, and working with various materials, design principles and techniques.

This means that you will derive **great enjoyment** from getting stuck in to various forms of creative activities, such as painting or drawing, using your hands and talents to create objects, and reading about and researching creative trends.

John, you should expect to gain very **high job satisfaction** if you choose to work in this area.

Although your overall Career Interests Test results can be a great indication of the type of work activities you will find enjoyable, they should not be the only factor considered when choosing a career. By completing all six CareerHunter tests, you will gain a more in-depth understanding of your interests, as well as your personality, motivations and aptitudes – and, therefore, make a better-informed career choice.

How you compare

You scored **higher than 99% of all users** who took the Career Interests Test for the Art, Craft and Design area. This is how your score in this area of interest compares with that of all other CareerHunter test-takers:

The median score for this interest area is 63%. Being **extremely passionate** about the Art, Craft and Design area puts your raw score **33% above the median**.

About this interest

Engineering involves the use of creativity, mathematical principles and scientific knowledge to design, test and build machines, structures, systems and processes that benefit humankind – like bridges, phones, computers, toys and clothes. It impacts every aspect of modern life, and this makes it an important driver in local, regional and global growth and innovation.

The people who work in this area are passionate about breaking technology barriers, improving people's lives and making an impact on the world. They do this across all branches of engineering, including chemical, electrical, biomedical, aerospace, mechanical and civil engineering.

Median Salary: \$78k

Annual salary estimates are based on percentile wage data collected through the BLS Occupational Employment Statistics (OES) survey of US workers. The median annual wage for all occupations is \$45,760.

Job outlook: 7% growth, 93.8k new jobs

Employment growth rates are based on 2020–2030 projections collected through the BLS Employment Projections (EP) program. The national average growth rate for all occupations professions is 8%

Your score explained

John, you scored **96%** in the Engineering interest area, which indicates that you have a **very strong preference** for working with scientific and mathematical principles.

Your score indicates that you are **extremely passionate** about hands-on mechanical tasks, such as building and fixing things, planning out maintenance, or studying how equipment works and operates.

This means that you will derive **great enjoyment** from working with practical systems and machines, learning how things operate, managing maintenance systems, and learning about mechanical principles and design.

John, you should expect to gain **very high job satisfaction** if you choose to work in this area.

Although your overall Career Interests Test results can be a great indication of the type of work activities you will find enjoyable, they should not be the only factor considered when choosing a career. About this interest

Healthcare is all about the improvement of public health, and is particularly appealing to people who love working with and caring for other people. There are many specialties in this area – including medicine, dentistry, nursing, pharmacy, audiology, optometry and occupational therapy – but all have the same goal: the prevention, diagnosis, treatment, amelioration and cure of diseases, injuries and illnesses.

Working in healthcare can be extremely challenging, both physically and mentally, due to the vicious cycle of work demand and staff shortages. But it's just as fulfilling and rewarding, as you're able to make a real difference in people's lives and in our broader communities.

Median Salary: \$75k

Annual salary estimates are based on percentile wage data collected through the BLS Occupational Employment Statistics (OES) survey of US workers. The median annual wage for all occupations is \$45,760.

Job outlook: 13% growth, 532k new jobs

Employment growth rates are based on 2020–2030 projections collected through the BLS Employment Projections (EP) program. The national average growth rate for all occupations professions is 8%.

Your score explained

John, you scored **84%** in the Healthcare interest area, which indicates that you have a **very strong preference** for supporting people with medical problems.

Your score indicates that you are **extremely passionate** about helping others keep well by maintaining and restoring their health in hospitals, outpatient care facilities or private practices.

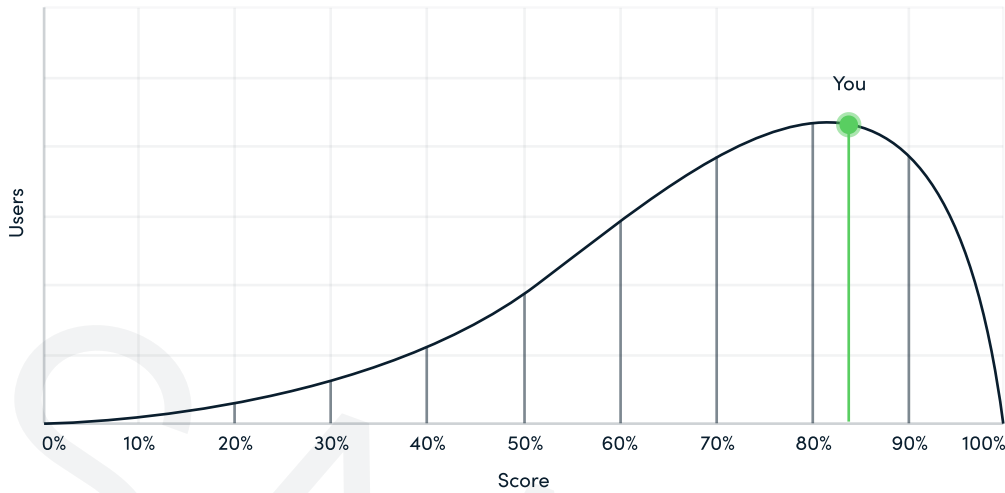

This means that you will derive **great enjoyment** from looking after people who are unwell or supporting people with general medical advice and care, as well as interacting with relatives and working long hours in demanding environments.

John, you should expect to gain **very high job satisfaction** if you choose to work in this area.

Although your overall Career Interests Test results can be a great indication of the type of work activities you will find enjoyable, they should not be the only factor considered when choosing a career. By completing all six CareerHunter tests, you will gain a more in-depth understanding of your interests, as well as your personality, motivations and aptitudes – and, therefore, make a better-informed career choice.
